

Spherical Plain Bearings with Fitting Crack

BPT Spherical Plain Bearings are manufactured with an outer ring with single split in the axial direction, the inner ring with cylindrical extension at either side - 2RS. Both the inner and outer are phosphate treated.

The GEEM type contains lubrication grooves and holes in the outer and inner rings.

The 2RS type is fitted with seal rings on each side.

GEEM Radial Wide Inner Ring Series										
Bearing Number	Dimensions (mm)							Load ratings(KN)		Weight (kg)
